INTERESTED IN BECOMING CANNABIS LEGAL?

**LEARN WHAT YOU CAN DO NOW
SO YOU ARE READY**

WHAT DO WE OFFER?

We come from both outside and inside this new industry. Outside, as consultants to the development community, we provide strategic guidance to clients for obtaining permits, licenses, and other approvals that saves time and money, while creating better projects. Inside, as cultivators and distributors of medical cannabis, we are intimately aware of the rapidly changing legislation — MMRSA — now regulating the cannabis industry and know how best to position businesses for success.

With 45 combined years of consulting expertise and 7 years operating a successful medical cannabis business, we are uniquely positioned to assist with obtaining the following licenses and associated approvals:

- **Cultivators**
- **Manufacturers**
- **Testers**
- **Distributors**
- **Transporters**
- **Dispensaries**

How we advise you is how we would advise ourselves!

WHERE DO YOU START?

How you prepare for your license over the next 18 months will greatly affect your success in obtaining one. We are experts in preparing the planning and environmental documents you need including:

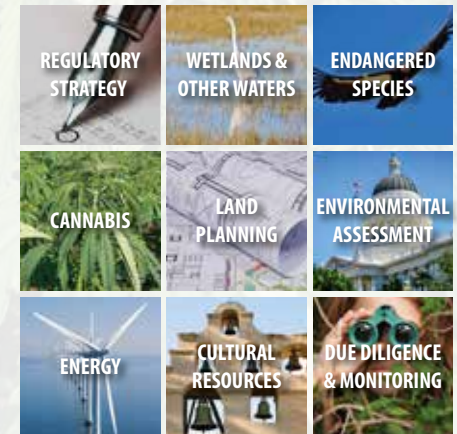

- **Local Registration & Permit Applications**
- **Site Plans & Grading Plans**
- **Planning Department Approvals**
- **Water Discharge Notices of Intent**
- **Biological Assessments**
- **Cultural Resource Assessments**
- **CEQA Compliance Documents**
- **Lake & Streambed Alteration Agreements**
- **Wetlands Permits**

We have been helping businesses like yours obtain the approvals they need for years. Give us a call if you would like to know more about how we can help you with your unique adventure.

HOW ARE WE DIFFERENT?

Barnett Environmental provides expert full-service permitting, licensing, planning, environmental assessment, and biological resource guidance for public and private sector residential, commercial, and industrial clients at a fraction of traditional consulting costs. We emphasize a strategic approach to project planning that strives to avoid or minimize project costs and construction delays. This efficient and economical approach is achieved without costly overhead charges through our network of independent professionals with many years of experience and recognized as the best in their respective fields.
